# Make Your Own
Tiny Stocking Bunting
Free Tutorial from She Quilts A Lot

Video & PDF Download

1 For each Tiny Stocking you will need one strip 1¼" x 8" and one strip 4½" x 8".

With right sides together sew the strips together using a ¼" seam allowance. Press seams open.

1.25" x 8"

4.5" x 8"

2 Use the template to trace out two stockings. Make sure you trace one stocking in each direction as shown!

3 Carefully cut out both shapes.

4 Align the tops and seams of both stocking pieces and then pin in place to make sure nothing moves while you are sewing.

5 Reduce the stitch length on your sewing machine to make it easier to manage the curved sections of the stocking.   Backstitching at the start and end sew around the stocking shape using a ¼" seam allowance. Leave a gap in the top of the stocking!

6 Snip into the seam allowance taking care to not snip the stitching line. This will help to achieve a rounded look when you turn the stocking right side out.

7 Turn the stocking right side out through the hole at the top.   Use a skewer or small crochet hook to push out the shape properly. Give it a quick press once you are happy with the shape.

8 Stuff with a small amount of wadding. Less is more when doing this step!   You want to give the stocking a slightly puffed look not make it over stuffed.

9 Fold a small piece of coordinating embroidery floss in half and then tie a knot in it. The knot will secure the hanger beneath the stitching line.

10 With the looped hanger inside the stocking pin the opening closed.

11 Sew the opening closed with coordinating thread. Your stitching line should be just less than ⅛" from the opening.
Repeat to make as many Tiny Stocking as you like!

12 Thread and knot the stockings onto a sparkly gold ribbon (or anything you have on hand!) approximately 5" apart.

Hang your bunting up and have a Merry Christmas!
